SUGGESTED INDEPENDENT REVIEWERS

Social Network Analysis and Mining (SNAM) – Springer Nature (Scopus Q1)

Manuscript Title: Mapping the 'Phygital Gap' in Public Policy Crisis: A Tri-Layer Computational Communication Study of Indonesia's Free Nutritious Meal (MBG) Program on Platform X
Corresponding Author: Indri Anjar Kartika Sari (indrianjar@gmail.com)
Institution: Universitas Pembangunan Nasional 'Veteran' Jawa Timur, Indonesia

Conflict of Interest Statement

In accordance with Springer Nature Editorial Policies and COPE (Committee on Publication Ethics) guidelines, the authors confirm that: (1) None of the suggested reviewers are affiliated with the authors' home institution; (2) None of the suggested reviewers have co-authored any publications, collaborative grants, or joint projects with any of the manuscript authors within the past five (5) years; (3) There are no personal, professional, or financial conflicts of interest between the suggested reviewers and the authors.

1. Suggested Reviewer: Assoc. Prof. Fajri Koto, Ph.D.

Track / Specialization: Natural Language Processing & Transformer Models
Position: Research Fellow / Associate Faculty in Natural Language Processing
Institution: School of Computing and Information Systems, The University of Melbourne, Australia
Institutional Email: fajri.koto@unimelb.edu.au
Identifiers: ORCID: 0000-0002-6983-6625 | Scopus Author ID: 57200277983
Primary Expertise: Natural Language Processing (NLP), Indonesian Language Models (IndoBERT, IndoNLU, IndoNLG), Sentiment Analysis, Transformer Architectures, Sarcasm and Irony Modeling.
Justification & Suitability: Dr. Fajri Koto is one of the foundational pioneers of Indonesian Transformer-based NLP benchmarks (including the indobenchmark/indobert-base-p2 model utilized in this study). His technical expertise is uniquely suited to rigorously evaluate the Micro-Affective Layer (9-emotion Plutchik classification) and the semiotic pretense framework used to uncover textual-emoji sarcasm incongruence.

2. Suggested Reviewer: Prof. Axel Bruns, Ph.D.

Track / Specialization: Complex Social Networks & Topological Analysis
Position: Professor of Communication and Media Studies / Australian Laureate Fellow
Institution: Digital Media Research Centre (DMRC), Queensland University of Technology (QUT), Australia
Institutional Email: a.bruns@qut.edu.au
Identifiers: ORCID: 0000-0002-4660-8438 | Scopus Author ID: 14050212700
Primary Expertise: Social Network Analysis (SNA), Twitter/X Network Topologies, Louvain Community Modularity, Echo Chambers, Structural Information Diffusion, Crisis Communication Informatics.
Justification & Suitability: Prof. Axel Bruns is an internationally renowned leader in large-scale social network analysis, structural polarization, and crisis communication dynamics on Platform X.

His insight will provide authoritative validation of our Macro-Topological findings, specifically the directed edge-list modeling, extreme network sparsity (d = 0.0011), reciprocity breakdown (1.21%), and hyper-fragmented modularity (Q = 0.9837).

3. Suggested Reviewer: Assoc. Prof. Marko M. Skoric, Ph.D.

Track / Specialization: Computational Social Science & Digital Public Sphere
Position: Associate Professor in Computational Communication
Institution: Department of Media and Communication, City University of Hong Kong, Hong Kong SAR
Institutional Email: mskoric@cityu.edu.hk
Identifiers: ORCID: 0000-0001-5232-4526 | Scopus Author ID: 24471966500
Primary Expertise: Computational Communication, Social Computing, Algorithmic Public Opinion, Southeast Asian Digital Politics, Social Network Mining.
Justification & Suitability: Prof. Skoric specializes in the intersection of computational data mining and sociopolitical communication in Asian contexts. He has extensive editorial and peer-review experience in top-tier computational communication and social computing venues, making him an ideal evaluator for the cross-disciplinary synthesis of the Tri-Layer framework.

4. Suggested Reviewer: Assoc. Prof. Nuurrianti Jalli, Ph.D.

Track / Specialization: Crisis Communication & Algorithmic Governance
Position: Assistant Professor of Public Relations and Computational Media
Institution: School of Media and Public Affairs, The George Washington University, United States
Institutional Email: nuurrianti.jalli@gwu.edu
Identifiers: ORCID: 0000-0002-3987-9207 | Scopus Author ID: 57209748643
Primary Expertise: Public Policy Crisis Communication, Algorithmic Information Ecosystems, Southeast Asian Digital Sphere, Situational Crisis Communication Theory (SCCT).
Justification & Suitability: Dr. Nuurrianti Jalli is a leading scholar on digital public diplomacy, policy reception, and crisis narrative dynamics in Southeast Asia. She possesses the domain expertise necessary to evaluate our conceptual application of Coombs' Situational Crisis Communication Theory (SCCT) and the operationalization of the "Phygital Gap" and "Algorithmic Oracle" phenomena.

Summary Table for Springer Editorial Manager Input

Field	Reviewer 1 (NLP)	Reviewer 2 (SNA)	Reviewer 3 (CSS)	Reviewer 4 (Crisis)
First Name	Fajri	Axel	Marko	Nuurrianti
Last Name	Koto	Bruns	Skoric	Jalli
Title	Assoc. Prof. / Ph.D.	Prof. / Ph.D.	Assoc. Prof. / Ph.D.	Assoc. Prof. / Ph.D.
Institution	Univ. of	Queensland Univ.	City Univ. Hong	George Washington

	Melbourne	Tech.	Kong	Univ.
Country	Australia	Australia	Hong Kong SAR	United States
Email	fajri.koto@unimelb.edu.au	a.bruns@qut.edu.au	mskoric@cityu.edu.hk	nuurrianti.jalli@gwu.edu
Conflict of Int.	No	No	No	No
